

Livelink Learning Management™

A learning management system for Livelink Enterprise Server

What is Livelink Learning Management?

Livelink Learning Management is a Learning Management System (LMS) that adds Web-based training features and capabilities to Livelink® Enterprise Server, the leading collaboration and content management software for global organizations that brings together people, processes, and information. Livelink Learning Management delivers a comprehensive system for training management, combining extensive training functionality with a centralized knowledge base.

With Livelink Learning Management, organizations can successfully manage the learning process—from identification of learning gaps, to course delivery and display, through the evaluation of the impact of training within the organization. Livelink Learning Management creates and nurtures an environment for continuous learning and low-cost training.

Whether you need to train a few employees or a few thousand, Livelink Learning Management offers participants the flexibility to learn independently—at their leisure and at their own pace. Because it is entirely Web-based, Livelink Learning Management allows for global management of all teaching and learning activities, enhancing personal knowledge building through collaboration and team work.

The screenshot displays the Livelink Learning Management interface. At the top, it shows the course title "Introduction to Knowledge Management" and the user "Admin" on "Friday, 12/05/2003". Below this is a search bar and navigation tabs for "Course", "Personal", "Enterprise", "Tools", and "Help". The main content area is divided into "Featured Items" (Coursework, Tests and assessments, Virtual classroom) and a "Detail View" for a selected course. The "Detail View" includes a list of items with "Copy", "Move", and "Delete" actions. A "Select TOC" dropdown is set to "Maritime Navigation". Below this, a table lists the course content:

	Title	Selected Test	Move To	Score	Delete
1	Inland Rules of the Road (HTML Format)				
2	References and Lesson Objective	Show		\$100001	
3	Steering & Sailing Rules				
4	Conduct of Vessels in any Condition of Visibility	Show		\$100001	
5	Conduct of Vessels in Sight of One Another	Show		\$100002	
6	Conduct of Vessels in Restricted Visibility	Show		\$100003	
7	Lights & Shapes	Show		\$100002	
8	Sound & Light Signals	Show		\$100003	
9	Exam	Show Final Test		\$100004	

At the bottom of the "Detail View", there is an "Add new Item" section with fields for "Title", "Resource", and "Action" (with an "Add" button), and "Update" and "Reset" buttons.

Benefits

- **Reduces training and travel costs**—Livelink Learning Management enables simultaneous training of individuals across disparate locations and systems, reducing the costs associated with training and travel.
- **Provides easy access to information**—Livelink Learning Management provides immediate access to courses, supplemental materials, and schedules via a standard Web browser. Shared learning is encouraged through the use of a virtual classroom environment, enabling better long-term retention of content.
- **Reduces preparation time**—Livelink Learning Management takes advantage of the knowledge repository by storing and providing easy access to course content and knowledge objects, so you can spend less time creating course content and more time taking advantage of knowledge resources that already exist in your organization.
- **Encourages independent learning styles**—Livelink Learning Management provides course flexibility to set course schedule, progress, and pace, so students can learn at their own pace.
- **Delivers meaningful results**—Livelink Learning Management delivers a valuable assessment of training results, skill improvement, and human resources management, so you can measure the success of your training programs.

Features

- Enables you to simultaneously train numerous individuals in distributed departments and locations.
- Complies with e-learning standards to enable use of off-the-shelf content and sharing content (import/export features).
- Provides immediate feedback about training progress and assessment results.
- Integrates seamlessly with skills and competency management applications and with knowledge management processes.
- Provides intuitive Web-based training and course management.
- Facilitates knowledge building through collaboration and sharing.
- Integrates seamlessly with Livelink Skills Management™.
- Supports the SCORM and AICC standard for content and assessments.
- Provides you with the ability to edit the IMS manifest directly from within Livelink Enterprise Server, to rearrange and augment course content with knowledge objects.
- Calculates final grades with weighted scores using standard spreadsheet functionality.
- Provides consolidated test results to students.
- Includes numerous training management features, such as:
 - **Course Object:** A virtual collaborative workspace where you can manage all course content and teaching/learning activities.
 - **Content Browser:** To view and navigate the course, and to import and export course materials.
 - **Test Marker:** Enables the import and export of tests, assessments, surveys, and feedback.
 - **Chat and Discussion Groups:** To encourage both synchronous and asynchronous collaboration.
 - **GradeBook:** Automatically records test results, assessments, and observations.
 - **Timetable:** Displays a calendar of all course events.

Technical Requirements

- **Livelink Enterprise Server Versions Supported**—Livelink Learning Management 2.1.0 works with Livelink Enterprise Server 9.2 on all supported platforms.
- **Web Browsers Supported**—Livelink Learning Management 2.1.0 supports the same Web browsers that the selected version of Livelink Enterprise Server supports.
- **Livelink Skills Management Versions Supported**—Livelink Learning Management 2.1.0 works with Livelink Skills Management 2.0.

ID_TECHNOLOGY

ID Technology è affinity partner di Open Text Corp. dal 1998.

Nell'ambito della partnership ID Technology ha sviluppato le applicazioni **Livelink Learning Management** e **Livelink Skill Management** utilizzate oggi da importanti realtà internazionali (Shell, Vodafone, Visa,...).

Forte di un'esperienza ampiamente consolidata non solo sugli aspetti tecnologici, ma anche progettuali e strategici, ID Technology offre servizi di consulenza, distribuzione, sviluppo, supporto tecnico e formazione sull'intera gamma di prodotti Open Text attraverso i suoi Professional & Technical Services.

I Professional Services operano a fianco dei clienti per identificare le esigenze a breve e a lungo termine, disegnare ed implementare le soluzioni più idonee a soddisfare tali esigenze e gestire le infrastrutture in modo ottimale.

I Technical Services offrono un programma di manutenzione e supporto tecnico solitamente regolamentato da appositi Service Level Agreement concordati con il cliente.
